

SENSI

The Sensi chair embodies modern chic in a colorful, durable, functional chair that also stacks! A unique built-in ganging mechanism slides out from under the seat to allow Sensi chairs to be easily joined into straight, even rows.

Sensi Chairs with Roland Table

SENSI

Featuring a refined original design, Sensi's frame structure is made of high quality materials. Frames are available in chrome or satin, while the seat and backrest are formed from bent plywood. Chairs are easy to stack (up to 5 chairs), providing additional storage possibilities. A built in ganging mechanism also allowed chairs to be joined into rows using metal connecting elements that slide from under the seat. Thanks to their versatility, Sensi chairs can be arranged into multiple combinations, while a modern color range of Formica laminates offer a stylish appearance. Sensi is also available in Beech veneer, stain to match or standard AGATI finishes.
