

POD  
Carrel

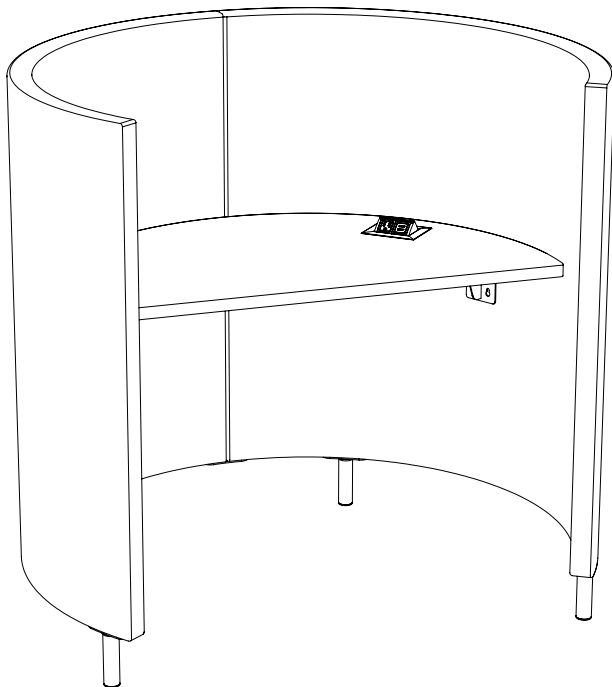

Meeting ADA standards, the Pod Carrel is an alternative for the Pod Single, while still giving users the comfort of an enclosed space. An update from wood carrels of the past, fabric surrounds provide a pleasant, sound-absorbing refuge. Great for providing acoustical, individual study within a public space. Charging capabilities on generous tabletop give users power at their fingertips with room to spare.

# POD Carrel

These private study tables with curved walls can be configured in a wide range of space-saving solutions -from serpentine rows to cluster layouts.
